- Fire Service: 199

COMFORTABLY SUSTAINABLE

We want you to enjoy your holiday without sacrificing any comfort. On the other hand, we know that if we deprive ourselves of our environment, we will lose much more than our comforts.

All our environmentally-friendly practices are along this axis of principles.

You'll experience some of them from the very beginning of your day. For example, we have introduced a zero-plastic breakfast at all serving stages. But you won't find plastic in your bathroom - our amenities are available in solid form - or in the fridge - since bottled water is only available in sustainable packaging.

There are, of course, the changes you don't see, but they make a difference — utilization of solar energy, inverter air conditioning, LED lighting, and efficient thermal insulation.

Plus, we're changing sheets every three days and towels every two days - thanks to specialized detergents, we avoid the energy - intensive 90-degree washing cycle. From the air conditioner button to the laundry switch, we make the best of everything that comes within our reach - and yours.

Last but not least, local, seasonal produce is a staple on our menu. Fresh, affordable, without unnecessary food miles, and most importantly, with a face: that of their producers, who we know, and they know us - and you will get to know them through our dishes.

As for the products that cannot be provided locally, we make sure they align with our philosophy - like the sustainable blend of Taf® coffee we use.

We wish you an enjoyable, comfortable stay. And if you want to contribute to improving our sustainable profile, we are at your disposal.

Any suggestions for a better world are always welcome!
